

## **PRO-114 Vessel Cleaner**

---

PRO-114 is a water soluble vessel cleaner.

### **Product Use Information**

---

The PRO-114 product is a water cleaning chemical that is generally used for vessel cleanouts and suspensions.

- Degreasers
- Enzyme cleaners
- Surfactants for wax and sludge removal

### **PRO-114 Batch Volumes**

---

If the vessel is still producing, drain fluid and fill vessel with 10% fresh water and add 5% PRO-114 to water. Circulate water through a hot oiler at 65 – 75 Celsius for 2 – 3 hours. If high solids are expected then producing to a vac truck prior to returning cleaning fluid to the hot oiler is recommended.

## **Physical Properties**

---

Density,	1.1 – 1.2
Form,	Liquid
pH,	7 - 8
Appearance,	White
Solubility,	Fresh Water – Soluble Oilfield Brine – Soluble Methanol – Soluble Aromatic Solvent – Dispersible

## **Material Compatibility Information**

---

Metals: 316 Stainless steel

Plastic: HD polyethylene  
HD polypropylene  
Teflon

Elastomers: Polytetrafluoroethylene [Teflon]

## **Vessel Suspension**

---

If long term storage is required for vessels, it is recommended that the vessel be circulated with PRO-801 corrosion inhibitor & oxygen scavenger & 2% with fresh water and inhibited with a nitrogen blanket.
